SUMMARY

Computer Science graduate and working Web Developer building responsive, user-friendly interfaces for a live commercial e-commerce product, from product discovery to checkout. I understand both how interfaces should work for users and how they are implemented, bridging design and development with a strong problem-solving mindset. Aiming to grow into website/full stack developer

EXPERIENCE

Web Developer June 2026 – Present

Commercial mattress e-commerce website (Sleep Universe)

- Build and maintain **responsive web pages and interactive components**, focusing on simple, professional interfaces that are easy for users to understand.
- Work on the full **user flow**: navigation, product browsing, product cards, “Make Your Own” mattress customization, checkout/payment, forms and contact page.
- Improve **usability** and mobile experience across the site; add notifications and an admin panel that support day-to-day operations.
- Turn client requirements into practical digital solutions; troubleshoot frontend and functional issues.

Artificial Intelligence Intern Sep 2024 – Nov 2024

King Mongkut’s Institute of Technology Ladkrabang (KMITL), Bangkok

- Developed an AI-powered student assistance chatbot integrating NVIDIA Nemotron through a hosted LLM API for conversational responses.
- Built student-facing features including authentication, course-related functionality, chatbot interactions, and an administrative dashboard.
- Deployed the chatbot online, enabling access without requiring a locally hosted LLM.

SELECTED PROJECTS

Sleep Universe – Mattress Website Commercial / Live

- Shaped the journey from **product discovery** → **customization** → **checkout**: product cards, detail pages and a layer-selection “Make Your Own” experience.
- Delivered checkout/payment, contact/enquiry flow and admin panel with a **responsive, mobile-friendly** interface.

RAI-BUDDY AI Powered Student Assistance Chatbot React · Python - LINE Bot · OCR

- Built the user journey for student assistance, including **authentication** → **course features** → **AI chatbot interactions**, with an administrative dashboard for managing platform functionality.
- Integrated NVIDIA Nemotron through a hosted LLM API to generate conversational responses and deployed the chatbot online for browser-based access.

SKILLS

UX/UI & Product: User Flows, Responsive Design, Usability, Interactive Interfaces, Product Thinking, Problem Solving, Collaboration
Frontend: React.js, JavaScript, HTML, CSS, Vite, Bootstrap
Backend & Data: Python, Flask, FastAPI, Node.js, Express.js, REST APIs, MySQL, MongoDB
AI & Tools: LLMs, Ollama, LangChain, OCR, Git, GitHub, VS Code, Linux, Streamlit

EDUCATION

B.Tech, Computer Science Engineering 2022 – 2026

BK Birla Institute of Engineering and Technology (BKBIET), Pilani

Languages: English (Fluent), Thai (learning), French (learning)
